

# Plan Outline

## Introduction

The goal of this project is to create a tracker that follows public sentiment towards certain conflicts. Initially, the focus will be on the Ukraine-Russia war. The scope will center on the US as this is the easiest to build an initial tracker. If successful, I can expand to other countries and perhaps provide a more worldwide view of public sentiment. If the project turns out to be successful, I will expand the tracker to include other ongoing conflicts such as the Sudan Civil War or Myanmar Conflict.

## Likely Sources

- Reddit (likely biased towards Ukraine)
- News Sources (either Neutral or biased towards Ukraine)
- GDELT Project
- X/Twitter
- Mastodon
- Discord?
- Telegram
- Youtube
- TikTok?
- Media Cloud
- Hatebase?
- ACLED?
